

ENVIRONMENTAL AND WETLAND CONSULTANTS

U.S. ARMY CORPS OF ENGINEERS
TULSA DISTRICT

Updated: September 2, 2011

The organizations listed provide a variety of environmental consulting services related to regulated activities in aquatic areas and wetlands. Services include aquatic and wetland jurisdictional delineations, preparation of permit applications, mitigation designs and monitoring, endangered species studies, and general environmental consulting. This list is provided as a courtesy to the general public without endorsement, recommendation, or certification of any the listed consultants or their work products. Consultants listed herein appear at their request.

It is the responsibility of the user to determine that a person or organization has the capability to provide the services needed. The user may wish to contact more than one consultant to obtain a comparison of qualifications and costs. This list is not exhaustive and the user may wish to consult other sources of information such as telephone or business listings and Internet search engines to find other firms capable of providing such services.

Wetland delineations for submission to the U.S. Army Corps of Engineers (Corps) must be accomplished in accordance with the *1987 Corps of Engineers Wetland Delineation Manual*, the applicable *Regional Supplement*, and any applicable supplemental guidance. Wetland delineations completed by these organizations will be subject to verification by the Corps and consequently may be changed as a result of the Corps review. Based on this review, Corps staff will make a final determination of the presence and extent of wetlands and other waters of the United States on a property. Appearance on this list does NOT indicate certification under the Corps Wetland Delineator Certification Program (suspended).

Consultants are listed in no particular order. Individuals, firms, or organizations interested in being listed herein are advised to submit a written request to the Tulsa District Corps:
