

SIGNS

WILL ROGERS COUNTRY CENTENNIAL TRAIL REGULATIONS

FOR YOUR SAFETY:

Firearm practice WILL NOT be allowed on public land adjacent to the trail.

The trail WILL BE closed to horse riders during deer muzzleloader and gun seasons.

To protect your trail's natural beauty, for everyone's enjoyment it will be necessary to follow these rules:

VEHICLES ARE TO REMAIN ON MAINTAINED ROADWAYS.

CAMPING IS PERMITTED AT DESIGNATED CAMPSITES AT BLUE CREEK RECREATION AREA ONLY.

TRASH AND LITTER WILL BE DEPOSITED IN PROVIDED CONTAINERS.

GROUND FIRES ARE ALLOWED ONLY IN FIRERINGS AT DESIGNATED CAMPSITES AT BLUE CREEK RECREATION AREA.

Chapter III, Title 36, C.F.R. is enforced on this trail. VIOLATORS WILL BE CITED, Copies are available from Park Rangers and the Project Office located near the dam.

ASK ABOUT OUR ADOPT A MILE PROGRAM: This program allows you or an organization to adopt a section of the trail for trail maintenance, trash-clean up, or upgrading facilities.

TRAIL DISTANCES

Miles 0 - 12 = Main Trail
Miles 13 - 16 = Dike Trail
Miles 17-18 = Kite Hill Trail
Total Trail Length = 18.0 Miles

OOLOGAH LAKE

Oologah Lake, a Corps of Engineers managed lake located in northeast Oklahoma, has more than 50,000 acres of land and water available for public use. Approximately 12,942 acres of land and water are managed by the Oklahoma Department of Wildlife Conservation; over 6,500 acres of land are licensed to the Corps of Engineers for Wildlife.

WILDLIFE MANAGEMENT

Various methods of land management are used on the Project to improve the food and cover available for wildlife. Principal game species such as white-tailed deer, bobwhite quail, fox and gray squirrels, swamp and cottontail rabbits, and raccoons benefit from these practices. Some areas on the Oologah State Game Management area are managed specifically for migratory wildlife such as ducks, geese, and mourning dove.

Grazing leases are used to meet resource management objectives such as habitat improvement. To maintain the condition of native grassland habitat for upland game birds and other species, selected areas are periodically burned. Other management techniques include reforestation, cover establishment, and food plots. Food plots consist of plantings of small grains which are used to supplement the natural food sources of wildlife.

FOR THE VISITOR

Overnight accommodations, services, and supplies are available at convenient locations adjacent to Government-owned property.

Hunting and fishing are regulated by Federal and State Laws, and similar licenses are required in other areas of Oklahoma.

Do not damage or remove trees or plants. Protect the forest—extinguish all fires. Keep the area beautiful for other visitors. Use trash cans to dispose of refuse.

Inquiries regarding Oologah Lake and its use are welcomed by the Project Manager and copies of regulations governing public use of this lake and other information may be obtained at the Project Office near the dam.
