

# FT. GIBSON – REPLACE SPILLWAY BRIDGE

## Tulsa District

U.S. ARMY CORPS OF ENGINEERS

BUILDING STRONG®

*FACT SHEET as of March 6, 2026*

**AUTHORIZATION:** Flood Control Act, August 18, 1941, incorporated in the Arkansas River multipurpose plan by the River and Harbor Act of July 24, 1946; Project Document HD 107, 76th Congress, 1<sup>st</sup> Session; and the Water Resources Development Act of 1986, Public Law 99-662

**TYPE OF PROJECT:** Construction

**PROJECT PHASE:** In active Construction

**BACKGROUND:**

The Fort Gibson Dam spillway bridge replacement is a critical public safety project to replace the aging State Highway 251A bridge, which was originally constructed in 1953. Due to significant structural degradation found during recent inspections, the bridge was closed to ensure the safety of the traveling public. This project will deliver a modern, resilient bridge, restoring a vital transportation link for residents and visitors and ensuring the continued safe operation of this important infrastructure.

**STATUS:** Construction Contract Awarded, In active construction.

**ISSUES:** None.

**FINANCIAL SUMMARY (\$):**

	<b><u>AMOUNT</u></b>
Updated Total Project Cost	\$ 65,719,421
Funds Received	\$107,234,000
Balance to Complete	\$41,514,579

**SCHEDULE/ COMPLETION:** CC820 Construction contract completion – 2 June 2028
