II. FINDINGS

A. Summary: Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

¹ Map(s)/figure(s) are attached to the AJD provided to the requestor.

² If the navigable water is not subject to the ebb and flow of the tide or included on the District’s list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

³ A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD Form.

D. Excluded Waters or Features

Excluded waters ((b)(1) – (b)(12)): ⁴				
Exclusion Name	Exclusion Size		Exclusion ⁵	Rationale for Exclusion Determination
P1	1.1N/A.	acre(s)	(b)(1) Lake/pond or impoundment that does not contribute surface water flow directly or indirectly to an (a)(1) water and is not inundated by flooding from an (a)(1)-(a)(3) water in a typical year.	P1 is mapped on a topographic map as an on-channel pond, within the headwaters of an intermittent stream. During the site visit on May 5, 2021, no culvert or other hydrologic connectivity was identified. Therefore, P1 has been determined to meet the definition of a b(1) water.
P2	0.14	acre(s)	(b)(8) Artificial lake/pond constructed or excavated in upland or a non-jurisdictional water, so long as the artificial lake or pond is not an impoundment of a jurisdictional water that meets (c)(6).	P2 is mapped on a topographic map as an off-stream pond. During the site visit on May 5, 2021, P2 was observed not to contribute downstream flow. Therefore, P2 has been determined to meet the definition of a b(8) water.
W1	0.12	acre(s)	(b)(1) Non-adjacent wetland.	W1 is not mapped on topographic map or National Wetland Inventory map but meets all three indicators of a wetland. No downstream channel was identified on aerial photographs. During the site visit on May 5, 2021, W1 was observed not to contribute downstream flow. A berm and roadway were observed to be located in the mapped stream channel location with no culvert or other structure for the conveyance of flow. Therefore, W1 has been determined to meet the definition of a b(1) water.
W2	0.17	acre(s)	(b)(1) Non-adjacent wetland.	W2 is not mapped on topographic map or National Wetland Inventory map but meets all three indicators of a wetland. No downstream channel was identified on aerial photographs. During the site visit on May 5, 2021, W2 was observed not to contribute downstream flow. A

⁴ Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

⁵ Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.
