

U.S. ARMY CORPS OF ENGINEERS  
REGULATORY PROGRAM  
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE

**I. ADMINISTRATIVE INFORMATION**

Completion Date of Approved Jurisdictional Determination (AJD): 03-MAY-2021

ORM Number: SWT-2021-00093

Associated JDs: N/A

Review Area Location<sup>1</sup>:

State/Territory: OK City: Oklahoma City County/Parish/Borough: Oklahoma County

Center Coordinates of Review Area: Latitude 35.413953 Longitude -97.631678

**II. FINDINGS**

**A. Summary:** Check all that apply. At least one box from the following list **MUST** be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are “navigable waters of the United States” within Rivers and Harbors Act jurisdiction within the review area (complete table in section II.B).
- There are “waters of the United States” within Clean Water Act jurisdiction within the review area (complete appropriate tables in section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in section II.D).

**B. Rivers and Harbors Act of 1899 Section 10 (§ 10)<sup>2</sup>**

§ 10 Name	§ 10 Size	§ 10 Criteria	Rationale for § 10 Determination
N/A	N/A	N/A	N/A

**C. Clean Water Act Section 404**

Territorial Seas and Traditional Navigable Waters ((a)(1) waters)<sup>3</sup>

(a)(1) Name	(a)(1) Size	(a)(1) Criteria	Rationale for (a)(1) Determination
N/A	N/A	N/A	N/A

Tributaries ((a)(2) waters):

(a)(2) Name	(a)(2) Size	(a)(2) Criteria	Rationale for (a)(2) Determination
N/A	N/A	N/A	N/A

Lakes and ponds, and impoundments of jurisdictional waters ((a)(3) waters):

(a)(3) Name	(a)(3) Size	(a)(3) Criteria	Rationale for (a)(3) Determination
N/A	N/A	N/A	N/A

Adjacent wetlands ((a)(4) waters):

(a)(4) Name	(a)(4) Size	(a)(4) Criteria	Rationale for (a)(4) Determination
N/A	N/A	N/A	N/A

<sup>1</sup> Map(s)/Figure(s) are attached to the AJD provided to the requestor.

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide and included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

**D. Excluded Waters or Features**

Excluded waters ((b)(1) – (b)(12))<sup>4</sup>:

Exclusion Name	Exclusion Size	Exclusion <sup>5</sup>	Rationale for Exclusion Determination
SWT-2021-093-01	500 feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool	This stream channel is depicted on the USGS Topographic map as an intermittent tributary of Campbell Creek. This stream is a first order headwater. Site photos show a bed and bank, no water can be seen within the channel from 2010 through 2020 via aerial imagery. This stream has an approximately 40-acre drainage area. The soils are best characterized as non-hydric, well drained, upland soils in the review area. The stream has a limited riparian buffer and is surrounded by a mowed pasture. Based on the best available data, this stream is best characterized as ephemeral in nature during a typical year of rainfall.
SWT-2021-093-02	950 feet	(b)(5) Ditch that is not an (a)(1) or (a)(2) water, and those portions of a ditch constructed in an (a)(4) water that do not satisfy the conditions of (c)(1)	The ditch was constructed in the uplands and drains into the ephemeral stream within the review area. This ditch is at the upper extent of the drainage area of the review area. This feature exhibits ephemeral flow.

**III. SUPPORTING INFORMATION**

**A. Select/enter all resources** that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

- Information submitted by, or on behalf of, the applicant/consultant: Jurisdictional Determination Request dated November 13, 2020.  
This information *(is)* sufficient for purposes of this AJD.  
Rationale: *N/A.*
- Data sheets prepared by the Corps: *Title(s) and/or date(s).*
- Photographs: Google Earth aerial imagery (2010-2020), site photos dated November 2, 2020
- Corps Site visit(s) conducted on: *Date(s).*
- Previous Jurisdictional Determinations (AJDs or PJDs): *ORM Number(s) and date(s).*
- Antecedent Precipitation Tool: *provide detailed discussion in Section III.B.*
- USDA NRCS Soil Survey: *ORM Data accessed on May 3, 2021.*
- USFWS NWI maps: *ORM Data accessed on May 3, 2021.*
- USGS topographic maps: *ORM Data accessed on May 3, 2021.*

**Other data sources used to aid in this determination:**

State/Local/Tribal Sources	N/A.
Other Sources	N/A.

- B. Typical year assessment(s):** The Antecedent Precipitation Calculator tool resulted in the site exhibiting normal rainfall conditions associated with the agents site visit dated November 2, 2020. The site was mostly experiencing normal conditions in the 6 months leading up to this date.
- C. Additional comments to support AJD:** The review area contains an ephemeral headwater stream, and an associated ditch. This determination is based on review of aerial imagery, resources maps, soils data, landscape position, as well as site photos and data provided by the agent.

<sup>1</sup> Map(s)/Figure(s) are attached to the AJD provided to the requestor.
